^as Benzoylecgonine
~as Propoxyphene and/or Metabolite
> Concentrations which exceed the upper limit of linearity are reported as follows: >(upper limit).

Low Creatinine and low specific gravity levels may indicate specimen dilution prior to or after specimen collection. Specimen recollection may be warranted if creatinine level is less than 5. Specimen is rejected and considered extremely dilute if the creatinine level is between 2-5. Specimen is considered substituted or non-normal if the combination of the creatinine level is below 2 and the specific gravity is less than 1.003.

POSITIVE RESULTS ONLY: All testing and reporting has been done in accordance with current DOT or other applicable regulations. The Medical Review Officer has made all reasonable efforts to contact the donor. Unless noted the donor has been given the option for re-confirmation of the sample or split-specimen testing.
